- Your 2002 return was for a full 12 months (or would have been if you were required to file) and you did not have any tax liability on that return.
- The amount of your withholding plus your estimated tax payments, if **paid in the required installments**, is at least 90% of the tax shown on your 2003 return or 100% of the tax shown on your 2002 return (110% if AGI was more than \$150,000) AND you are not using the annualized income installment method.

Part III Annualized Income Installment Method Schedule.

Use this schedule ONLY IF you earned taxable income at an UNEVEN RATE during 2003 (See Example A). If you earned your income at approximately the same rate each month (See Example B), then you should not complete this schedule. If you choose to figure the penalty, see the instructions for Worksheet II — Regular Method to Figure Your Underpayment and Penalty, on page 4 of the instructions.

Example A: If you were a commissioned salesperson who earned no income during the first three months of the year, earned most of your income during the following six months, and earned very little during the last three months, you should complete this schedule. You may be able to benefit by using the annualized income installment method. The required installment of estimated tax figured using the annualized method may be less than your required installment figured using the equal installment method.

Example B: If you worked all year and earned a monthly salary that did not change much during the year, you should not complete this schedule.

Note: To complete this schedule correctly, you must first complete Side 1, Part II, line 1 through line 6.
